2000	Visiting Professor RWTH Aachen, Institute of Building Design
2023	Appointed as Professor at the Technical University of Vienna, Faculty of Architecture, Institute of Architecture and Design, Building Construction and Design 2

Dietmar Feichtinger Architects

Dietmar Feichtinger founded the studio in Paris in 1993. Today, with a team of more than twenty collaborators based in Paris, France, and Vienna, Austria, the practice operates primarily across Europe. Dietmar Feichtinger Architects has established a strong reputation for its inventive structures and its investigative approach to design. The work bridges architecture and engineering, exploring the dynamic relationship between these two disciplines.

The studio continually strives to integrate environmental responsibility and sustainable development into an architecture that is both elegant and sensitive, with a deep respect for nature and people.

In addition to seven nominations for the European Union Prize for Contemporary Architecture – Mies van der Rohe Award, Dietmar Feichtinger Architects has received numerous international awards and publications recognizing the excellence of its design and built work.

Over the past two decades, the studio has welcomed collaborators from more than twenty nationalities, reflecting a strong commitment to diversity and inclusion. The practice is proud to be an Equal Opportunity Employer, fostering genuine professional equality between women and men.

In 2024, the office continues to evolve with the integration of long-standing team members José-Luis Fuentes, Rita Alegría, and Jan Feichtinger into its leadership. After more than 30 years of practice, the ambition remains unchanged: to create spaces that contribute meaningfully to the social fabric of the built environment.

The architecture of Dietmar Feichtinger Architects is conceived to be thoughtful and responsive, addressing the evolving needs and challenges of our time.

Turnover in ME
